

BLUE HAWK

Data is the New Oil

Rapid collection and processing of data drives modern efficiency. Don't get stuck with a vendor slogging through legacy forms or resource intensive workflows. Integrity EPC's field crews apply Blue Hawk SF (Smart Form) technology to modernize our inspection workflow for our clients, customized to best serve each client's exact needs.

Blue Hawk™ *smart forms* are tailored to solve oil and gas inspection, compliance, and data challenges.

Blue Hawk SF (Smart Form)

Blue Hawk SF is our full-featured and customizable Smart Form platform that Integrity EPC field personnel uses as a courtesy to our clients. It deploys on tablets or phones to perform Mechanical Integrity inspections, DOT inspections, JSA forms, calibration logs, and more. Gone are the days of filling out printed integrity forms with pen & paper and tedious data entry. With Blue Hawk SF, our inspectors will complete forms on any tablet with surprising ease and control, and submit digitally to internal or external approvers. You'll instantly get rewarded with digital reports, and all collected data already digitized. It is a win-win!

- Highly customizable data acquisition app that deploys on ANY mobile device
- We're everywhere – our application is available for iOS (App Store) and Android (Google Play)
- Built for Mechanical Integrity, DOT compliance, and other inspection services Integrity EPC provides
- Automation is standard – we automatically send our clients reports via email, and create integrity work requests
- Reports are done when we click "submit"
- Feature rich: GPS enabled, collect digital signatures, RFID enabled, embed pictures, offline capable, set required fields & logic, preload drawings and documentation, multiple sign-off, annotate images, geofencing, customizable logic to prevent incomplete forms, and more!

Blue Hawk SF Capabilities:

- API 510, 570, 12R1
- STI SP001 / 12-series tanks
- JSA
- Calibration Logs
- Construction QA
- Vendor Surveillance
- & More!
