

Integrity EPC Services

Integrity EPC is a group of integrity, engineering, procurement, and construction consultants that leverage oil and gas industry experience to create innovative solutions for each client's unique situation.

All IEPC Advanced Ultrasonic technicians hold additional industry Performance Demonstration Qualifications such as QUTE, QUPA, QUSE, ISQ, EPRI, Calpine, Shell, and Chevron endorsements.

Pipeline Integrity

ILI anomaly evaluation pipe digs

- Long Range Guided Wave
- Short Range Guided Wave
- Automated Corrosion Mapping
- O.D. Corrosion Laser Mapping
- Phased Array – ERW Welds
- Time of Flight Diffraction (TOFD)
- General NDT Services

Mechanical Integrity

- Automated Corrosion Mapping (up to 800°F)
- Pulsed Eddy Current Array (PEC)
- Eddy Current Testing (ET)
- Electromagnetic-acoustic transducers (EMAT)
- Long Range Guided Wave
- Short Range Guided Wave
- Infrared Thermography
- IRIS Testing
- O.D. Corrosion laser scanning
- Phased Array Ultrasonics
- High Temperature PAUT (up to 500°F)
- Phased Array Flange Inspection
- Multi-Skip Phased Array (CUPS)
- Tank Chime Inspection
- Real Time Radiography (RTR)
- Remote Field Testing (RFT)
- Remotely Piloted Inspection Systems
- Time of Flight Diffraction (TOFD)
